	Examiner CHRISTOPHER D. PRONE	Art Unit 3738	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/13/09 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 37, 39, 40, and 43 are rejected under 35 U.S.C. 103 as being unpatentable over Kline USPN 5,376,094 in view of Savage USPN 6,530,899 B1.

Kline discloses the invention substantially as claimed being a surgical snare device comprising a tubular sheath 14 having a handle 10, a shaft 12 that is slidable within the sheath, a snare loop 20 having a plurality of legs attached at the end of the shaft that is slidable within the sheath moving it from an expanded position to an unexpanded position. However, Kline does not disclose a swivel connection between the shaft and snare loop.

Art Unit: 3738

Savage teaches the use of a swivel connection between two elements comprising a bearing encased in a housing [3:44-49] in the same field of endeavor for the purpose of preventing kinking of flexible medical hoses.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to replace the crimp connection of Kline with the bearing swivel connection comprising a swivel housing and bearings as taught by Savage in order to allow easy rotation without kinking of the cables.

Claims 7 and 42 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kline in view of Savage as applied to Claims 1, 3, 37, 39-41, and 43 above, and further in view of United States Patent 4,326,530 Fleury Jr.

Kline as modified by Savage discloses the invention substantially as claimed being described supra. However, the combination does not disclose that the surgical loop includes a braid.

Fleury Jr teaches the use of a surgical loop comprising a braid in the same field of endeavor for the purpose of providing a loop with enhanced fidelity giving the user a better feel for what is happening with the loop.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the braided loop of Fleury Jr with the surgical snare device of Kline as modified by Savage in order to provide a loop with enhanced fidelity.

Response to Arguments

Applicant's arguments with respect to all claims have been considered but are moot in view of the new ground(s) of rejection.
